

## **Kalle Hesstvedt joins the Carbon Removal team**

We are very pleased that Kalle Hesstvedt has decided to join the Carbon Removal team. Kalle has an extensive experience of great relevance for our ambition to develop large scale Direct Air Capture facilities in Norway. Kalle started his career working in the offshore oil industry, including two years offshore. Kalle then worked as Greenpeace International's climate campaign coordinator, focussing on climate science and politics, for 8 years, continuing as political advisor in the Parliament, primarily for the Energy- and environment committee, for the same time period. He has worked nearly 20 years in wind power project development with RES and Havgul Clean Energy. Kalle has attended a number of IPCC and COP meetings as an observer.
